DETAILED ACTION

Formal Matters

Claims 8-14, 18, 21-27, 31, 34 are pending and under consideration.

Response to Amendment

Applicant's arguments filed 04/16/2004 have been fully considered but they are persuasive in part, for the reasons set forth below.

The rejection of claims 8-14, 18, 21-27, 31, 34 under 35 U.S.C. 112, first paragraph as lacking enablement has been obviated by Applicant's amendment and is thus withdrawn.

The rejection of claims 8-14, 18, 21-27, 31, 34 under 35 U.S.C. 112, first paragraph as lacking written description has been obviated by Applicant's amendment and is thus withdrawn.

The rejection of claims 8-14, 18, 21-27, 31, 34 under 35 U.S.C. 102(b) as being anticipated by Ma et al. (1997), has been withdrawn.

Claim Rejections - 35 USC § 112 second paragraph

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8-14, 18, 21-27, 31, 34 stand rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention, for reasons of record set forth in the Office Action of 1/28/2004.

Art Unit: 1646

Claims 8 and 21 are indefinite in that they are drawn to methods using peptides of at between at least 18 and 100 amino acid residues, which comprises 18 contiguous amino acid residues of SEQ ID NO: 1, but it is not clear if a peptide which is longer than 18 amino acids comprises contiguous sequences from SEQ ID O: 1 as well, or only needs to comprise 18 contiguous amino acids of SEQ ID NO: 1.

Claims 8-14, 18, 21-27, 31, 34 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: In claims 8 and 21, the claims recite that the open probability of the channel formed by the CFTR increases by at least 25% (and the dependent claims recite that the increase in open probability is from 50-200%), however, there is not a measurement step, or a step wherein the open probability in the presence of the peptide is compared to the open probability of a control, or the open probability in the absence of peptide. Claims 9-14, 18, 22-27, 31, 34 are rejected insofar as they depend on claims 8 and 21.

Conclusion

No claim is allowed.
